

AIR BLOW GUN SILVENT 4010-S

Item number: 40100139285, 40100239285

SILVENT 4010-S: combines highly concentrated blowing force with an easily maneuverable valve construction and low sound level. Designed with aerodynamic slots to attain optimal utilization of your compressed air while keeping the sound level to an absolute minimum. The valve is power-steered, making it easy to operate with just one hand. Its "dead man's grip" closes instantly if the handle is dropped. Suitable for applications where 100% force is always required.

"Dead man's grip" The valve features a "dead man's grip", which means that it closes instantly if the handle is dropped. Safe and easily maneuverable The valve is power-steered, making it easy to operate with just one hand. A light press of a thumb or finger is all that is needed. Comfortable The rubber insulation on the handle provides a firm grip while protecting the hand against both heat and cold."
