

AIR BLOW GUN SILVENT 4020-LF

Item number: 40200169065, 40200269065

SILVENT 4020-LF: a unique product with Laval nozzle that combines highly concentrated blowing force with an easily maneuverable valve construction and low sound level. Its blowing force of 100 N (22.1 lbs) is twice that of the 4015-LF. The nozzle is made of stainless steel, making it suitable for use in practically any environment where extra high blowing force is required, e.g. the paper and manufacturing industries, steel mills etc. Features adjustable blowing force that is easily adjusted to any strength between 5% and 100%.

"Dead man's grip" The valve features a "dead man's grip", which means that it closes instantly if the handle is dropped. Safe and easily maneuverable The valve is power-steered, making it easy to operate with just one hand. A light press of a thumb or finger is all that is needed. Comfortable The rubber insulation on the handle provides a firm grip while protecting the hand against both heat and cold."
