

AIR BLOW GUN SILVENT 500-R

Item number: 50080169408, 50080269408

SILVENT 500-R: part of a completely new generation of air blow guns designed for blowing applications aimed at avoiding scratches on equipment and products. The 500-R is equipped with an energy-efficient Laval nozzle that is part of Silvent's new "SILVENT SOFT™" series. The air nozzle is specially made in EPDM rubber to minimize the risk of scratches. The product meets the unique combination of demands for a scratch-free surface and high blowing force by applying Silvent's patented Laval technology.

No muscle strain

The trigger mechanism requires a pressure of only 7 N (25 oz), which means that the gun can be used frequently without the risk of taxing muscles. The average finger strength of men is 96 N (339 oz) and of women, 81 N (295 oz). When less than 10% of the maximum strength of a finger is used, no injury arises due to muscle strain.

Ergonomics and precision

The combination of an ergonomic handle and a short trigger for one or two fingers provides a perfect grip as well as the possibility to aim the air blow gun with precision and feeling. The ergonomic design of the handle automatically gives you the optimal blowing position so that you do not need to bend your wrist.

Triggers

Fitted with short triggers as standard to provide the most ergonomic grip. If desired however, they can also be equipped with extended triggers.
