

AIR BLOW GUN SILVENT 750-W

Item number: 07500169411, 07500269411

SILVENT 750-W: equipped with an energy-efficient flat nozzle made of Zytel that generates an extremely strong and effective blowing force at the same time that the sound level is exceptionally low. Compressed air is optimally used in this air blow gun, which through its unique design introduces a completely new blowing technology feature. This air blow gun is an excellent choice for large surfaces that need to be blown clean because of its unique blowing pattern and high blowing force!

Up to 12 times greater blowing force

The air blow guns of the 750 series have up to 12 times stronger blowing force than ordinary air blow guns on the market today. Despite the high blowing force, both the sound level and energy consumption are low.

Durable construction

The 750 grip has been developed for jobs requiring high blowing power and working environments that demand a robust grip and valve construction. These air blow guns can also be used when wearing work gloves and the grip is considerably more impact resistant than conventional guns. Commonly used in glass works, paper mills, foundries, steel mills, etc.

Thumb regulation

Thumb regulation is standard on the pistol handle to provide the most ergonomic grip. If desired, the handle can also be fitted with an extended trigger for hand regulation.
