

AIR BLOW GUN SILVENT 758-R

Item number: 07580169412, 07580269412

SILVENT 758-R: part of a completely new generation of air blow guns designed for blowing applications aimed at avoiding scratches on equipment and products. The 758-R is equipped with an energy-efficient Laval nozzle that is part of Silvent's new "SILVENT SOFT™" series. The air nozzle is specially made in EPDM rubber to minimize the risk of scratches. The product meets the unique combination of demands for a scratch-free surface and high blowing force by applying Silvent's patented Laval technology.

Up to 12 times greater blowing force

The air blow guns of the 750 series have up to 12 times stronger blowing force than ordinary air blow guns on the market today. Despite the high blowing force, both the sound level and energy consumption are low.

Durable construction

The 750 grip has been developed for jobs requiring high blowing power and working environments that demand a robust grip and valve construction. These air blow guns can also be used when wearing work gloves and the grip is considerably more impact resistant than conventional guns. Commonly used in glass works, paper mills, foundries, steel mills, etc.

Thumb regulation

Thumb regulation is standard on the pistol handle to provide the most ergonomic grip. If desired, the handle can also be fitted with an extended trigger for hand regulation.
