

AIR BLOW GUN SILVENT 767-L

Item number: 07670169533, 07670169539

SILVENT 767-L is designed for working environments that require high blowing power. The valve handle is robust and tailored to provide the operator with the best possible grip. Silvent's special technology makes it possible to combine a concentrated and strong stream of air with a low noise level. The unique design of the nozzle prevents compressed air from entering the bloodstream and injuring the operator. The blowing power is roughly 7 times stronger than a regular air blow gun.

Up to 12 times greater blowing force

The air blow guns of the 750 series have up to 12 times stronger blowing force than ordinary air blow guns on the market today. Despite the high blowing force, both the sound level and energy consumption are low.

Durable construction

The 750 grip has been developed for jobs requiring high blowing power and working environments that demand a robust grip and valve construction. These air blow guns can also be used when wearing work gloves and the grip is considerably more impact resistant than conventional guns. Commonly used in glass works, paper mills, foundries, steel mills, etc.

Thumb regulation

Thumb regulation is standard on the pistol handle to provide the most ergonomic grip. If desired, the handle can also be fitted with an extended trigger for hand regulation.
