

AIR BLOW GUN SILVENT PRO ONE +

Item number: 00010169624, 00010269624

Pro One + is equipped with an extra powerful multi-Laval air nozzle that generates a blowing force that is 50% stronger compared to a regular Pro One while also minimizing the sound level.

1. Low weight, slim design.

The ergonomic handle allows several different grips to make work easier and reduce the risk of repetitive strain injuries. The safety air gun is also designed to comfortably fit both small and large hands.

2. Best possible control of blowing force.

Thanks to the Pro One's unique technology, the operator has full control over the infinitely variable blowing force. Because trigger opening force is independent of pressure, the risk of repetitive strain injuries is reduced.

3. Two hanging options –

by the trigger or by the specially designed lug. Both surrounding areas are reinforced to withstand increased wear.

4. Reduced risk of joint injuries and hearing loss.

Pro One is equipped with a patented check valve to avoid recoil and peak-sound pressure when disconnecting. This reduces the risk of joint injuries and hearing loss. The connection is also fitted with a filter that prevents large particles from entering the air gun. Pro One has a ¼" metal connector.
