

AIR BLOW GUN

SILVENT PRO ONE-MJ6

Item number: 00010169779, 00010269779, 00010269779

SILVENT Pro One-MJ6: with a micro-nozzle for high precision, low noise and low energy consumption. Due to the Pro One's unique technology, the operator has full control over the infinitely variable blowing force. This is an alternative to Pro One if you need an air blow gun with less blowing force. The blowing force is 2.5 N (8.8 oz) or approx. 75% of that of a standard air blow gun.

1. Low weight, slim design.

The ergonomic handle allows several different grips to make work easier and reduce the risk of repetitive strain injuries. The safety air gun is also designed to comfortably fit both small and large hands.

2. Best possible control of blowing force.

Thanks to the Pro One's unique technology, the operator has full control over the infinitely variable blowing force. Because trigger opening force is independent of pressure, the risk of repetitive strain injuries is reduced.

3. Two hanging options –

by the trigger or by the specially designed lug. Both surrounding areas are reinforced to withstand increased wear.

4. Reduced risk of joint injuries and hearing loss.

Pro One is equipped with a patented check valve to avoid recoil and peak-sound pressure when disconnecting. This reduces the risk of joint injuries and hearing loss. The connection is also fitted with a filter that prevents large particles from entering the air gun. Pro One has a ¼" metal connector.
